

## The Four Ukulele Sizes

The most common ukulele sizes are SOPRANO, CONCERT, TENOR, and BARITONE.

As you can see, soprano is the smallest and baritone is the biggest.

Size	Soprano	Concert	Tenor	Baritone
Length	21"	23"	26"	30"
Scale	13"	15"	17"	19"
Tuning	G-C-E-A	G-C-E-A	G-C-E-A	D-G-B-E

There isn't a universal standard for ukulele sizes. Most ukes will be close to the figures given above, but the actual measurements may vary slightly depending on the manufacturer. [Soprano, Concert, and Tenor Vs. Baritone](#): **Soprano, concert,** and **tenor** ukes are all tuned the same way: **G-C-E-A**. This is known as standard tuning. The shared tuning of these three sizes means that if you learn to play on a soprano ukulele, you will also be able to play a concert or tenor. **Baritone** ukuleles have a different tuning: **D-G-B-E**. While this tuning has some similarities to the other sizes, it's still in its own category. Most ukulele music is intended for a soprano, concert, or tenor size ukulele.
